Action Taken Report for Staff/Faculty feedback on Curriculum 2022-23

We obtained full positive responses here. Still we are running following practices to strengthen the curriculum.

- The Principal and senior faculty provide essential knowledge and course objectives to new staff members.
- Every year, we ask the subject in-charge at the library for a list of newly published text and reference books that are not available in our collection.
- The experiments already mentioned in the syllabus are based on theoretical topics, and teachers conduct these experiments accordingly.
- During practical sessions, students fully grasp the principles, mechanism and procedures.
- Introduce design thinking methodologies, which involve empathizing with students, defining problems, ideating solutions and testing. This approach nurtures innovative thinking by emphasizing user-centered problem-solving.
- Generally, the time period allotted by the university provides a sufficient number of hours to cover the syllabus.
- This curriculum offers advanced education that requires lifelong learning.
- Management provides all required facility to conduct the curriculum smartly.
- Pharmacy Council of India gives very proper weightage to theory and practical.
- Each faculty member discusses the significance of CO's, PO's, and PEO's with the students, resulting in positive responses from them.
- Encouraging the students to engage in different projects, enabling them to delve deep into subjects and develop analytical thinking, a skill highly valued by employers.
