Action Taken Report for Teachers/Faculty feedback on Curriculum 2019-20

We obtained full positive responses here. Still we are running following practices to strengthen the curriculum.

- The Principal with senior faculty provide essential knowledge and course objectives to new staff members.
- We ask the subject in-charge at the library for a list of newly published text and reference books to upgrade our library collection.
- The experiments already mentioned in the syllabus are based on theoretical topics, and teachers conduct these experiments accordingly.
- In practical (Odd semester), students acquire a comprehensive understanding of principles and procedures by engaging in tasks that encompass diverse relevant models, compounds, dosage forms, and even unfamiliar things. This approach prompts students to engage in critical thinking and the application of their acquired knowledge.
- This curriculum offers advanced education that requires lifelong learning.
- Management provides all possible kind of facility to conduct the curriculum effectively.
- Each faculty member discusses the significance of CO's, PO's, and PEO's with the students, resulting in positive responses from them.
