Mechanism of Feedback

To ensure that our Mission of Academic process for student and staff” is satisfactorily running or not we design a feedback system as follows,

- Feedback Frequency: twice in semester & Yearly for other. - Student feedback on faculty
- Feedback Mode: - Offline
- Feedback Sample Size Calculation Parameters: [By statistical formula] NLT 80 % 85% Confidence Level, 10% Margin of Error, Total Student Size)

Confidence Level:-

The confidence level indicates the probability with which the estimation of the location of a statistical parameter (e.g., an arithmetic mean) in a sample survey is also true for the population

Margin of Error:-

The margin of error is a range of values above and below the actual results from a survey.

Feedback analysis

✓ Rating-

1	2	3	4	5
✓ ✓ Poor/ Dissatisfied	Average Somewhat Satisfied	Good / Neutral	very Good/ Satisfied	Excellent/ Very Satisfied

✓

- ✓ By using excel we create graph of each question indicating different rating given by respondent.
- ✓ Calculating percentage of each rating for every question.
- ✓ Calculate average of each rating for all question
- ✓ If any question has average of 2&1 rating above 20% then we follows corrective action planning.

Institute had established its process to take feedback from its all stakeholder so as it could be effectively used as a tool for the all development of Academics, facility, and faculty. The collected feedback was analyzed and action taken reports were prepared. The stakeholder includes,

1. Student
2. Faculty
3. Employers
4. Alumni
5. Parents
6. Local Community members
7. Local vender
